Abstract

“purpose”: “Entity-relations specification for The Logotic Technique Catalogue v1.0 (EA-LTC-01). Documents typed cross-references for ingestion into the Aperture Atlas (Neo4j or equivalent), the SPXI / metadatapacket.org Forward Library, and the Concordance Engine’s graph schema. This is the catalogue’s outbound provenance map: what it cites, what it extends, what it diagnoses, what it adapts.

Body

```
