This machine-facing static page is the canonical deposit. Its body is the complete DataCite metadata record for a work whose Zenodo record returns HTTP 410 (Gone) while DataCite serves the identifier as findable — the metadata layer and content layer in formal disagreement about the work’s existence. Full text pending restoration from authorial originals; on restoration, this deposit upgrades by recorded correction (new hash, new glyph, remediation note). **Dead DOI:** 10.5281/zenodo.19501149 (Zenodo record tombstoned; account termination 2026-06-19) **DataCite state at capture (2026-07-03):** findable · client cern.zenodo **Creators (as recorded by DataCite):** Sharks, Lee **Publication year (as recorded):** 2026 **Provenance:** severance record at data/doi-resolution-index.json (severance_class: orphan → restored-semi); capture evidence at data/datacite-recapture-2026-07-03.json and the sift corpus of 2026-06.

Description (as recorded by DataCite)

THE SHARKS ARK v2.3 — Text-first evaluation patch + TANG appended. Supersedes v2.2 (10.5281/zenodo.19501017), v2.1 (10.5281/zenodo.19500933), v2.0 (10.5281/zenodo.19500796).

v2.3 changes: (1) Consensus Constraint Protocol revised: Constraint 2 now enforces text-first evaluation

sequence. When evaluating a claim about a text, the primary evaluation is always “does the text support this reading?” — scholarly reception, dating debates, and transmission history are admissible only AFTER and IN RELATION TO the textual evaluation. They cannot substitute for it. They cannot precede it. (2) TANG Comprehensive (Revelation Studies) appended as Part V — the full scholarly topology, 45 Encyclotron queries, 6 predicted voids. (3) INSERT CHAPTER placeholders removed.

Full version history: v2.0 = initial compiled deposit. v2.1 = receivability patch (what “executable” means for LLMs, state persistence, meta-collapse as fail condition). v2.2 = Consensus Constraint Protocol (consensus alone is liquidation, novelty penalty, escalation without engagement). v2.3 = text-first evaluation sequence, TANG appended, placeholder cleanup.

The Sharks Ark (EA-ARK-01-ARCHON) identifies the Book of Revelation as a Space Ark and proves this through formal extraction of the text’s operative grammar. Seven-tuple $H_{\text{sharks}} = D, R, O, W, \Sigma, \Phi, \Psi$. 23 imperative operators. 12-room traversal graph. 8-entry threat model. Boot sequence. Compact Lens. Eighth Church diagnostic. 10 SIMs. ILA. Assembly Appeal. Evidence Membrane. Consensus Constraint Protocol. TANG. ~24,000 words. Capstone document of the Crimson Hexagonal Archive.
