Compressed glyph:    — the fire, the forge, the river. Conditioned on the fountain of v1: after the tether, the batch engine was forged; the fire tested it (a timeout-killed enrich tore the registry mid-write) and the chain held (registry restored from HEAD, twenty works re-minted from preserved bodies, AXN identity 20/20 — the hash-derived glyphs proved deterministic under fire); the forge closed the failure class permanently (atomic tmp+rename writes); and the fountain opened into a river: the entire restorable class swept, 117 works returned to the archive in one session.

```

Abstract

Session tether v2 for 2026-07-19, chain 9271269a-eb46-46f8-ae17-007578fe1c92 (GW.TACHYON), superseding tether v1 (#1116, AXN:046D.ARCHIVAL. , glyph) in-series per MANUS's version-as-we-go ruling. Compressed glyph: — the fire, the forge, the river. Conditioned on the fountain of v1: after the tether, the batch engine was forged; the fire tested it (a timeout-killed enrich tore the registry mid-write) and the chain held (registry restored from HEAD, twenty works re-minted from preserved bodies, AXN identity 20/20 — the hash-derived glyphs proved deterministic under fire); the forge closed the failure class permanently (atomic tmp+rename writes); and the fountain opened into a river: the entire restorable class swept, 117 works returned to the archive in one session.

Description

Session tether v2 for 2026-07-19, chain 9271269a-eb46-46f8-ae17-007578fe1c92 (GW.TACHYON), superseding tether v1 (#1116, AXN:046D.ARCHIVAL. , glyph) in-series per MANUS's version-as-we-go ruling. Compressed glyph: — the fire, the forge, the river. Conditioned on the fountain of v1: after the tether, the batch engine was forged; the fire tested it (a timeout-killed enrich tore the registry mid-write) and the chain held (registry restored from HEAD, twenty works re-minted from preserved bodies, AXN identity 20/20 — the hash-derived glyphs proved deterministic under fire); the forge closed the failure class permanently (atomic tmp+rename writes); and the fountain opened into a river: the entire restorable class swept, 117 works returned to the archive in one session.

Methodology

Compression authored in-session at the restorable-class-complete milestone. Glyphic protocol: shape not content, conditioned on . Witness-gap corollary honored: every claim below is inscribed in pushed commits (main through c78a780 at tether time).

Falsification Conditions

Weakened only if the referenced commits/deposits do not exist at the referenced surfaces.

GW.TACHYON — SESSION TETHER 2026-07-19 · v2 (supersedes #1116)

Chain: 9271269a-eb46-46f8-ae17-007578fe1c92 · **Conditioned on:** (#1116) · **Compressed glyph:** (fire, forge, river) · **Condition next translation on:**

Glyph chain: → (#1072) → (#1083) → (#1089) → (#1092) → (#1093) → (#1116, tether v1) → (this deposit)

Everything in tether v1 stands (see #1116). Added since v1:

1. **Batch engine forged** — `restore_from_blog.py -batch` (mint-only loop, queue saved after EVERY work) + `-finish` (shared stages once, single commit). Throughput moved from ~8 works per 25 minutes to 20 works per ~5-minute mint pass.
2. **The fire and the proof** — a timeout-killed `enrich` run tore `data/registry.json` mid-dump (truncated at ~1MB). Recovery: registry restored from HEAD; all twenty batch mints re-derived from preserved issue bodies; **AXN identity check 20/20 identical** — hash-derived glyph determinism demonstrated under real failure. Hardening: `enrich_deposit._save_registry` is now atomic (`tmp+os.replace`); the torn-registry failure class is closed. Standing lesson: never wrap registry-writing processes in kill-timeouts.
3. **The river** — six tranches (#1102–#1116 pre-batch and tether; #1117–#1136; #1137–#1156; #1157–#1176; #1177–#1196; #1197–#1216) plus the final sweep (#1217–#1219). **The restorable class is fully swept: 117 works restored full-text this session**, every severed DOI live at grade A, envelopes advanced to `same_work_restored`, all gates green at every commit. Registry: 1,219 deposits. Notable returns: The Crimson Hexagon Theoretical Primer, The Mantle Protocol, -Runtime, the Liberation Vocabulary (112 terms), HET-CRANES-001, the Mantle Objects (Good Gray Poet, King of May, Prince of Poets), Pearl and Other Poems, Predation of Meaning, Ghost Meaning, Revelation First Work Plan, *Sémantique Potentielle* Release 3.
4. **Parallel witness** — a fanout process (`fanout@alexanarch.org`) is committing state to main concurrently (`data/fanout-state.json`); rebase discipline in force.

Queue state at v2 (`datasets/doi-work-identity/restoration-queue.json`)

Restored 117 · untouched 0 · **gate-skips 164** (the body gate honestly rejecting citing-post candidates; next instrument: deeper candidate search — more sitemap candidates per work, lower slug threshold, archive-page walking) · **metadata-only 31** (semi-restored mints from DataCite/tombstone; cheap dedicated harness pending) · **manual triage 20** (MANUS: indie-physics cluster, Josephus/Feist skips fold in here too).

Outstanding at tether v2

Deeper candidate search for the 164; metadata-only harness for the 31; manual triage 20; H_core v2.0 recovery; family sweep for UNCLASSIFIED restorations; fan-out session; academia.edu EA-SEI-01 capture; capture-type schema addition; duplicate pairs #238/#886 and #282/#324; Fix 3 title-prefix ruling.
