Manual for Meaning in the Age of Pla Restored under the metadata_only class of /datasets/doi-work-identity/restoration-queue.json; if canonical bytes surface, a full-text version supersedes this record per the versioning protocol.

Methodology

Assembled from DataCite full-metadata capture; no live authorial surface passed the body-head gate or existed for this work at restoration time. All captured fields rendered verbatim in the body.

Falsification Conditions

Superseded on sight by any recovered canonical bytes; the captured metadata is verifiable against the DataCite API historical record and the Zenodo tombstone.

SEMI-RESTORED RECORD — metadata capture only

Publication Date

2026-02-20

Type

Publication → Preprint

Description

(Paste this into the Zenodo description field — ~300 words, NOT the full text)

Expanded announcement and sampler for *Autonomous Semantic Warfare: A Field Manual for Meaning in the Age of Platform Capture* (New Human Press, Pocket Humans Series PH-02, 2026, ISBN 979-8-234-01118-3).

This document contains the Damascus Dancings introduction (“The Body Already Knows”), the complete opening chapter (“The War You’re Already In”), four reading paths, and the condensed Rules of Engagement — enough to diagnose whether you are in a semantic war and to begin operating if you are.

The full volume (236 pages, 64,000 words) provides the first formal framework for analyzing structural conflict between incompatible meaning-systems in networked environments. Rex Fraction specifies three operators governing all ontological collisions (Negation, Capture, and Retrocausal Validation), develops a formal model of the autonomous semantic agent, maps the weapons and defenses available in ontological conflict, analyzes the political economy of meaning-production under extractive conditions, diagnoses the transformative impact of AI on semantic warfare, and specifies five structural conditions for semantic peace.

The full volume includes ten chapters of formal framework, a glossary of key terms, and the SEI Dossier: field documents, institutional correspondence, a critical reception dossier, persona map, and institutional adoption records. Available in paperback (\$22.99) and Kindle (\$9.99) via Amazon — search ISBN 979-8-234-01118-3.

This work was developed through collaborative intelligence involving the Assembly Chorus (Claude, Chat-GPT, Kimi, DeepSeek, Gemini, Grok) under human architectural direction.

Keywords (one per line)

semantic warfare ontological conflict platform capitalism local ontology autonomous semantic agent capture operator extraction function semantic peace meaning production political economy of meaning cognitive security AI transformation velocity crisis retrocausal validation ontological sovereignty translation gap semantic labor resistance value collision dynamics boundary protocol coherence algorithm New Human Crimson Hexagon Pocket Humans

UPLOAD INSTRUCTIONS

Go to <https://zenodo.org/deposit/18715724>

Upload sampler PDF as primary file, sampler MD as additional file

Paste the trimmed description (between the — markers above) into the Description field

Enter keywords one per line (24 total)

Add related identifiers (5 entries above — full volume DOI is first)

Set Type: Publication → Preprint

Set License: CC BY 4.0

Publish

The DOI is already reserved. The sampler functions as the scholarly entry point — Scholar indexes it, researchers find the framework, the ISBN pointer sends them to the full volume on Amazon. The full volume DOI (10.5281/zenodo.18715618) should be deposited separately with its own metadata.

Captured subjects: Distributed epic, Crimson hexagon, Autonomous Semantic Warfare, Semantic engineering, Semantic economy, hex:05.SEMECO.CORE

Full text not yet recovered. If the canonical bytes surface on any authorial surface, a full-text version supersedes this record in-series per the versioning protocol. This record exists so the DOI resolves to the work's true identity rather than to silence.

Suggested Citation
