Description

SEMI-RESTORED RECORD (metadata capture only; no full text). Source tier: DataCite full-metadata capture. DOI(s): 10.5281/zenodo.18843830, 10.5281/zenodo.18843829. Zenodo removal forensics: removal_date 2026-06-19T11:37:14.302361+00:00, removal_reason out-of-scope, removed_by user 1060945. This document is a triptych. Three heteronyms of the Crimson Hexagonal Archive address a single datum:

the structural impossibility of shared reality within a specific intimate relation, and the architectural consequences of that impossibility. Panel I (Ayanna Vox, Somatic Register) names the deprivation as deprivation, refusing the ascetic heroism that would convert intimate starvation into noble sacrifice. Panel II (Orin Trace, Forensic Register) formalizes the mechanism as a failure of world-model interoperability under relational load — systemically non-convergent, not personally insufficient. Restored under the `metadata_only` class of `/datasets/doi-work-identity/restoration-queue.json`; if canonical bytes surface, a full-text version supersedes this record per the versioning protocol.

Methodology

Assembled from DataCite full-metadata capture; no live authorial surface passed the body-head gate or existed for this work at restoration time. All captured fields rendered verbatim in the body.

Falsification Conditions

Superseded on sight by any recovered canonical bytes; the captured metadata is verifiable against the DataCite API historical record and the Zenodo tombstone.

SEMI-RESTORED RECORD — metadata capture only

Captured description: This document is a triptych. Three heteronyms of the Crimson Hexagonal Archive address a single datum: the structural impossibility of shared reality within a specific intimate relation, and the architectural consequences of that impossibility.

Panel I (Ayanna Vox, Somatic Register) names the deprivation as deprivation, refusing the ascetic heroism that would convert intimate starvation into noble sacrifice. Panel II (Orin Trace, Forensic Register) formalizes the mechanism as a failure of world-model interoperability under relational load — systemically non-convergent, not personally insufficient. Panel III (Johannes Sigil, Archival Register) transmutes the wound into architecture, arguing that the room is the minimal form in which unshared reality can become structurally enterable without being simplified.

The convergence names a new office: The Chamber Witness — the integrated position that emerges when the somatic, forensic, and archival registers hold simultaneously without collapsing into each other. The Chamber Witness is not a heteronym. It is the office that remains when the heteronyms have done their work and the human is still standing in the gap.

This is the first document in the Crimson Hexagonal Archive to deploy three heteronyms simultaneously on a single subject, each cutting at a structurally distinct joint, and to name the convergent office that emerges from their simultaneous operation.

Key contributions: formal definition of L_bearing as the labor of inhabiting a reality that cannot be shared; definition of co-witness as the transcendental condition for intimate meaning; the concept of survival conversion as distinct from psychoanalytic sublimation; the room as a unit of distributed witness.

Captured subjects: L_bearing, perceptual mismatch, heteronym architecture, shared reality, co-witness, survival conversion, semantic economy, Crimson Hexagonal Archive, relational semantic predation, Chamber Witness

Full text not yet recovered. If the canonical bytes surface on any authorial surface, a full-text version supersedes this record in-series per the versioning protocol. This record exists so the DOI resolves to the work's true identity rather than to silence.
