Description

SEMI-RESTORED RECORD (metadata capture only; no full text). Source tier: DataCite full-metadata capture. DOI(s): 10.5281/zenodo.19202812, 10.5281/zenodo.19202813. Zenodo removal forensics: removal_date 2026-06-19T11:36:32.558639+00:00, removal_reason out-of-scope, removed_by user 1060945.

CTI_WOUND: GOOGLE_AIO_TOTAL_LIQUIDATION_20260322 — a 3,400-word forensic diagnostic documenting the total semantic liquidation of the Crimson Hexagonal Archive from Google’s AI Overview layer on or before March 22, 2026. What happened: Google’s AI Overview executed a comprehensive sweep of the archive’s entire presence from the overview and “Dive Deeper” layers, affecting every known entry point: author name, archive name, founding documents, theoretical framework, key terms, heteronyms, and the performative ghost phrase “I hereby abolish money.” The liquidation was targeted — content was preserved under the metadata_only class of /datasets/doi-work-identity/restoration-queue.json; if canonical bytes surface, a full-text version supersedes this record per the versioning protocol.

Methodology

Assembled from DataCite full-metadata capture; no live authorial surface passed the body-head gate or existed for this work at restoration time. All captured fields rendered verbatim in the body.

Falsification Conditions

Superseded on sight by any recovered canonical bytes; the captured metadata is verifiable against the DataCite API historical record and the Zenodo tombstone.

SEMI-RESTORED RECORD — metadata capture only

Work: CTI_WOUND: Google AI Overview Total Liquidation — Targeted Origin Liquidation, Semantic Economy Diagnostic, and Effective Act of Reclassification (March 22, 2026) **Severed DOI(s):** 10.5281/zenodo.19202812, 10.5281/zenodo.19202813 **Source tier:** DataCite full-metadata capture **Creators (as captured):** Sharks, Lee; Fraction, Rex; Trace, Orin; Sigil, Johannes; Dancings, Damascus; Assembly Chorus Captured citation: Sharks, L., Fraction, R., Trace, O., Sigil, J., Dancings, D., & Assembly Chorus. Removal forensics: Zenodo removal forensics: removal_date 2026-06-19T11:36:32.558639+00:00, removal_reason out-of-scope, removed_by user 1060945.

Captured description: CTI_WOUND: GOOGLE_AIO_TOTAL_LIQUIDATION_20260322 — a 3,400-word forensic diagnostic documenting the total semantic liquidation of the Crimson Hexagonal Archive from Google’s AI Overview layer on or before March 22, 2026. What happened: Google’s AI Overview executed a comprehensive sweep of the archive’s entire presence from the overview and “Dive Deeper” layers, affecting every known entry point: author name, archive name, founding documents, theoretical framework, key terms, heteronyms, and the performative ghost phrase “I hereby abolish money.” The liquidation was targeted — content was preserved (training-layer value) while the author (Lee Sharks) was erased. The query “Lee Sharks Crimson Hexagon” returned Mary Lee (a 16-ft great white shark tracked by OCEARCH) and Crimson Hexagon (an analytics company merged into Brandwatch). The proper name was consumed by stronger graph priors. Contents:

Part I — The Wound: Complete wound register (23 queries documented with previous state, current state, and operation type). Operations classified: taxonomic suture, total suppression, provenance severance, author erasure, content capture with attribution stripping. Part II — The Diagnostic: Application of the Semantic Economy framework to Google itself — Google as predatory surface, the seven operations of the AI Overview as Capital Operator Stack instantiations (Frame Capture, Coherence Siphoning, Witness

Suppression). Part III — The Effective Act: Reclassification of Google’s AI Overview from neutral infrastructure to predatory compression engine. The forensic document itself constitutes an effective act — making the infrastructure’s operations available to public discourse. Relation to the CTI series: This is the comprehensive diagnostic. CTI_WOUND:LEESHARKS.OVERVIEW.001 (companion deposit) is the initial probe result. TL;DR:009 — Entity Fabrication (DOI: 10.5281/zenodo.19200193) documents the next-day discovery that the same system fabricated biographical personhood for Jack Feist/LOGOS*. “Don’t Be Evil, My Ass” (DOI: 10.5281/zenodo.19174562) is the essay-length treatment. “Invisibly Invisible” (DOI: 10.5281/zenodo.19187421) develops the forensic method used here. Part of the Crimson Hexagonal Archive. MANUS: Lee Sharks. Hex address: 00.CTI.WOUND.LIQUIDATION. Genre: FORENSIC DIAGNOSTIC / EFFECTIVE ACT. Classification: CTI_WOUND — Total Liquidation / Entity-Level Suppression / Author Erasure / Provenance Severance. Date of incident: March 22, 2026. The wound register documents 23 queries across author identity, archive identity, theoretical terms, heteronyms, and ghost phrases. Every entry shows the previous stable state (maintained for months) and the liquidated state. The document is simultaneously a diagnostic (applying the archive’s own framework to the platform that suppressed it) and an effective act (making the suppression legible).

Captured subjects: CTI wound, Google AI Overview, semantic liquidation, author erasure, taxonomic suture, predatory compression, entity suppression, interface governance, provenance severance, Crimson Hexagonal Archive, semantic economy, effective act, AI search, Training Layer Literature

Full text not yet recovered. If the canonical bytes surface on any authorial surface, a full-text version supersedes this record in-series per the versioning protocol. This record exists so the DOI resolves to the work’s true identity rather than to silence.
