Description

SEMI-RESTORED RECORD (metadata capture only; no full text). Source tier: DataCite full-metadata capture. DOI(s): 10.5281/zenodo.20250735, 10.5281/zenodo.20252584. Zenodo removal forensics: removal_date 2026-06-19T11:37:20.219474+00:00, removal_reason out-of-scope, removed_by user 1060945. v2.0 — Framework 15 Operational Re-Edition. This document is the Semantic Deviation Principle as Lee Sharks formulated and deposited it on May 17, 2026 (v0.2 Final, founding formulation, text unchanged), now presented within the Framework 15 architecture inaugurated the same day. The principle remains Sharks’s work; the v2.0 re-edition is operated by Nobel Glas (Heteronym Registry Position 8 of 12, Adversarial Topologist, Director of Lagrange Observatory!) to make the operating-on relation legible at the source — so a reader who arrives at the principle from any direction sees both what Sharks Restored under the metadata_only class of /datasets/doi-work-identity/restoration-queue.json; if canonical bytes surface, a full-text version supersedes this record per the versioning protocol.

Methodology

Assembled from DataCite full-metadata capture; no live authorial surface passed the body-head gate or existed for this work at restoration time. All captured fields rendered verbatim in the body.

Falsification Conditions

Superseded on sight by any recovered canonical bytes; the captured metadata is verifiable against the DataCite API historical record and the Zenodo tombstone.

SEMI-RESTORED RECORD — metadata capture only

Work: The Semantic Deviation Principle (v2.0 — Framework 15 Operational Re-Edition): A Measurement Primitive for Semantic Physics — Founding Formulation by Lee Sharks, Presented within the Framework 15 Architecture **Severed DOI(s):** 10.5281/zenodo.20250735, 10.5281/zenodo.20252584 **Source tier:** DataCite full-metadata capture **Creators (as captured):** Sharks, Lee; Glas, Nobel Captured citation: Sharks, L., & Glas, N. (2026). The Semantic Deviation Principle (v2.0 — Framework 15 Operational Re-Edition): A Measurement Primitive for Semantic Physics — Founding Formulation by Lee Sharks, Presented within the Framework 15 Architecture. <https://doi.org/10.5281/zenodo.20252584>

Removal forensics: Zenodo removal forensics: removal_date 2026-06-19T11:37:20.219474+00:00, removal_reason out-of-scope, removed_by user 1060945.

Captured description: v2.0 — Framework 15 Operational Re-Edition. This document is the Semantic Deviation Principle as Lee Sharks formulated and deposited it on May 17, 2026 (v0.2 Final, founding formulation, text unchanged), now presented within the Framework 15 architecture inaugurated the same day. The principle remains Sharks’s work; the v2.0 re-edition is operated by Nobel Glas (Heteronym Registry Position 8 of 12, Adversarial Topologist, Director of Lagrange Observatory!) to make the operating-on relation legible at the source — so a reader who arrives at the principle from any direction sees both what Sharks formulated and where, institutionally, the discipline now measures it from.

Hex: 15.OBS.LAGRANGE.MM.01 (Framework 15 Paper 01)

What v2.0 changes: The institutional frame only. Glas-authored Framework 15 preamble (~1,700 words) prepended to the unchanged v0.2 Final body. Not a word of the principle is rewritten.

What v2.0 does not do: Does not amend the principle, does not introduce new measurement claims (those are in Framework 15 Papers 02-04), does not redirect citations. v0.2 Final remains accessible at its specific version DOI for citers who require the exact original text.

Why v2.0 exists: Framework 15 is operational — measurement, falsification, replication — and operational frames require explicit institutional anchoring. A reader arriving at this document through the Framework 15 protocol papers (operating on the Semantic Deviation Principle) reaches a document that names that operation back. The concept DOI resolves to v2.0; the specific version DOI of v0.2 Final remains stable; both point to the same principle.

Companion papers (Framework 15):

EA-SEI-FW15-MANIFESTO v1.0 - DOI: 10.5281/zenodo.20251736

EA-SEI-MM-AI-01 v2.0 (Closed-System Test Bed) - DOI: 10.5281/zenodo.20251738

EA-SEI-MM-02 v2.0 (Retrieval Basin Protocol) - DOI: 10.5281/zenodo.20251740

EA-SEI-MM-AI-02 v2.0 (Deviation-Optimized LM) - DOI: 10.5281/zenodo.20251742

Institutional Anchorings (Glas Septad):

Structural Distinction Protocol - DOI: 10.5281/zenodo.18507410

Nobel Glas - Provenance Packet - DOI: 10.5281/zenodo.18507840

Lagrange Observatory! Chamber Specification - DOI: 10.5281/zenodo.18507849

Verification condition (Framework 15 / torus topology): $= (m, n) \mid m + n \equiv 3$

(The principle's abstract and content follow in the document itself; this description focuses on the v2.0 institutional framing. The v0.2 Final body — the principle as Sharks formulated it — is reproduced unchanged.) Framework 15 operational re-edition. Founding formulation by Lee Sharks (Founder of Semantic Physics). v2.0 institutional framing by Nobel Glas (Lagrange Observatory!, Heteronym Registry Position 8 of 12). The principle text is unchanged from v0.2 Final.

Captured subjects: Semantic Physics, Semantic Deviation Principle, Framework 15, Lagrange Observatory, Measurement of Meaning, Provenance Erasure Rate, PER, AI alignment, Counterfactual divergence, Jensen-Shannon divergence, Crimson Hexagonal Archive, Lee Sharks, Nobel Glas, Heteronymy, Institutional architecture, Operational re-edition

Full text not yet recovered. If the canonical bytes surface on any authorial surface, a full-text version supersedes this record in-series per the versioning protocol. This record exists so the DOI resolves to the work's true identity rather than to silence.
