Description

SEMI-RESTORED RECORD (metadata capture only; no full text). Source tier: DataCite full-metadata capture. DOI(s): 10.5281/zenodo.19927467, 10.5281/zenodo.19927468. Zenodo removal forensics: re-

moval_date 2026-06-19T11:36:01.399521+00:00, removal_reason out-of-scope, removed_by user 1060945. A patent-poem for DashFace — a food delivery platform with an in-cabin camera trained on the driver’s face, micro-expression analysis, identity verification (‘Is this really Samantha?’), a Driver Entertainment Score (DES) that ranks drivers by their capacity to produce engaging content while operating a motor vehicle, and a tip-modulation algorithm that adjusts gratuity based on real-time facial positivity metrics. The specification is a diagnostic instrument, not an operational blueprint. It describes the terminal logic of platform surveillance — the face as the last extractable surface — so Restored under the metadata_only class of /datasets/doi-work-identity/restoration-queue.json; if canonical bytes surface, a full-text version supersedes this record per the versioning protocol.

Methodology

Assembled from DataCite full-metadata capture; no live authorial surface passed the body-head gate or existed for this work at restoration time. All captured fields rendered verbatim in the body.

Falsification Conditions

Superseded on sight by any recovered canonical bytes; the captured metadata is verifiable against the DataCite API historical record and the Zenodo tombstone.

SEMI-RESTORED RECORD — metadata capture only

Work: DashFace: System and Method for Real-Time Micro-Expression Surveillance, Identity Verification, and Content Monetization of Contract Delivery Personnel — A Patent-Poem **Severed DOI(s):** 10.5281/zenodo.19927467, 10.5281/zenodo.19927468 **Source tier:** DataCite full-metadata capture **Creators (as captured):** Sharks, Lee Captured citation: Sharks, L. (2026). DashFace: System and Method for Real-Time Micro-Expression Surveillance, Identity Verification, and Content Monetization of Contract Delivery Personnel — A Patent-Poem. Zenodo. <https://doi.org/10.5281/zenodo.19927468>

Removal forensics: Zenodo removal forensics: removal_date 2026-06-19T11:36:01.399521+00:00, removal_reason out-of-scope, removed_by user 1060945.

Captured description: A patent-poem for DashFace — a food delivery platform with an in-cabin camera trained on the driver’s face, micro-expression analysis, identity verification (‘Is this really Samantha?’), a Driver Entertainment Score (DES) that ranks drivers by their capacity to produce engaging content while operating a motor vehicle, and a tip-modulation algorithm that adjusts gratuity based on real-time facial positivity metrics. The specification is a diagnostic instrument, not an operational blueprint. It describes the terminal logic of platform surveillance — the face as the last extractable surface — so that the logic can be recognized and refused. Includes a historiography of workplace surveillance from the panopticon through Taylor through Hochschild through Uber, and a Levinasian analysis of what happens when the face of the Other becomes a content delivery interface. Claim 10: ‘A self-negating patent comprising a technical specification for a system that should not be built, wherein the specification’s precision is the mechanism of its critique.’ Third in the Patent-Poem series after the Self-Propagating Fried Tuberous Crisp (DOI: 10.5281/zenodo.19647366) and ClownCloud (DOI: 10.5281/zenodo.19926962). = 1 The face is not a platform. The smile is not content. The driver is not a creator. Let Samantha drive. = 1.

Captured subjects: DashFace, patent-poem, gig economy, platform surveillance, micro-expression, emotional labor, content monetization, precariat, Levinas, panopticon, Hochschild, food delivery, Crimson Hexagonal Archive, driver surveillance, facial recognition

Full text not yet recovered. If the canonical bytes surface on any authorial surface, a full-text version supersedes this record in-series per the versioning protocol. This record exists so the DOI resolves to the work's true identity rather than to silence.
