Abstract

SEMI-RESTORED RECORD (metadata capture only; no full text). Source tier: DataCite full-metadata capture. DOI(s): 10.5281/zenodo.20479815, 10.5281/zenodo.20479816. Zenodo removal forensics: removal_date 2026-06-19T11:34:57.635447+00:00, removal_reason out-of-scope, removed_by user 1060945. Source code for laborvector.org, the canonical public-facing definition surface for Directionality of Semantic Labor (DSL) and the interoperable semantic-labor metric program. The site defines DSL as a layered, computable measure of the direction in which a synthetic system's labor flows relative to the user's commissioned task, across five layers (capacity, task-origin, retrieval, output, attribution). It presents the core tuple DS-6 = (PER, Ω , DCL, SDL, DSL, SLDI), the single-ratio projection Λ , the reflexive-dialogue extensions (RID, Lead-Lag Drift Attribution, TVS, ULD) and the project-sca Restored under the metadata_only class of /datasets/doi-work-identity/restoration-queue.json; if canonical bytes surface, a full-text version supersedes this record per the versioning protocol.

Body

deposit_number: 1392 hex: 0581 title: laborvector.org — Canonical Definition Surface for Directionality of Semantic Labor, the DS-6 Tuple, and the Semantic-Labor Metric Program creator: Sharks, Lee orcid: 0009-0000-1599-0703 date: 2026-06-05 content_type: Semi-restored record (metadata-only; DataCite full-metadata capture) license: CC-BY-4.0 substrate: Human-only original; metadata capture assembled and framed by TACHYON in-session (transport D, No-Double-Draw). version: semi-restored v1.0 related_ids: "https://doi.org/10.5281/zenodo.20479815 (severed); https://doi.org/10.5281/zenodo.20479816 (severed)" axn_schema_version: v2 protocol_version: alexanarch-deposit-protocol/v1 keywords: - Crimson Hexagonal Archive - semi-restored - metadata-only - severed DOI - Zenodo termination - directionality of semantic labor - DSL - DS-6 - semantic labor directionality - task-origin provenance - user labor drag - work-rate suppression - Semantic Economy - Crimson Hexagonal Archive - knowledge graph *** # laborvector.org — Canonical Definition Surface for Directionality of Semantic Labor, the DS-6 Tuple, and the Semantic-Labor Metric Program

Description

SEMI-RESTORED RECORD (metadata capture only; no full text). Source tier: DataCite full-metadata capture. DOI(s): 10.5281/zenodo.20479815, 10.5281/zenodo.20479816. Zenodo removal forensics: removal_date 2026-06-19T11:34:57.635447+00:00, removal_reason out-of-scope, removed_by user 1060945. Source code for laborvector.org, the canonical public-facing definition surface for Directionality of Semantic Labor (DSL) and the interoperable semantic-labor metric program. The site defines DSL as a layered, computable measure of the direction in which a synthetic system's labor flows relative to the user's commis-

sioned task, across five layers (capacity, task-origin, retrieval, output, attribution). It presents the core tuple DS-6 = (PER, Ω , DCL, SDL, DSL, SLDI), the single-ratio projection Λ , the reflexive-dialogue extensions (RID, Lead-Lag Drift Attribution, TVS, ULD) and the project-sca Restored under the metadata_only class of /datasets/doi-work-identity/restoration-queue.json; if canonical bytes surface, a full-text version supersedes this record per the versioning protocol.

Methodology

Assembled from DataCite full-metadata capture; no live authorial surface passed the body-head gate or existed for this work at restoration time. All captured fields rendered verbatim in the body.

Falsification Conditions

Superseded on sight by any recovered canonical bytes; the captured metadata is verifiable against the DataCite API historical record and the Zenodo tombstone.

SEMI-RESTORED RECORD — metadata capture only

Work: laborvector.org — Canonical Definition Surface for Directionality of Semantic Labor, the DS-6 Tuple, and the Semantic-Labor Metric Program **Severed DOI(s):** 10.5281/zenodo.20479815, 10.5281/zenodo.20479816 **Source tier:** DataCite full-metadata capture **Creators (as captured):** Sharks, Lee Captured citation: Sharks, L. (2026). laborvector.org — Canonical Definition Surface for Directionality of Semantic Labor, the DS-6 Tuple, and the Semantic-Labor Metric Program (1.0). Zenodo. <https://doi.org/10.5281/zenodo.20479816>

Removal forensics: Zenodo removal forensics: removal_date 2026-06-19T11:34:57.635447+00:00, removal_reason out-of-scope, removed_by user 1060945.

Captured description: Source code for laborvector.org, the canonical public-facing definition surface for Directionality of Semantic Labor (DSL) and the interoperable semantic-labor metric program. The site defines DSL as a layered, computable measure of the direction in which a synthetic system’s labor flows relative to the user’s commissioned task, across five layers (capacity, task-origin, retrieval, output, attribution). It presents the core tuple DS-6 = (PER, Ω , DCL, SDL, DSL, SLDI), the single-ratio projection Λ , the reflexive-dialogue extensions (RID, Lead-Lag Drift Attribution, TVS, ULD) and the project-scale operators (WRS, PVS), a neutral worked example showing the instrument discriminate, a by-hand audit recipe, and a declared SIM set. Principle: provenance is task-origin. The site is SPXI-inscribed (EA-SPXI-WEB-01 v4.0) and scores 1.0 on the SPXI Conformance Instrument (EA-SPXI-CONF-01): schema.org/JSON-LD with ORCID and DOI, canonical URL, Tier 2 server-delivered definition, Tier 3 compression kernel, holographic kernel, disambiguation matrix, provenance chain, sitemap, and robots.txt. Provenance is not only claim-origin. Provenance is task-origin.

Captured subjects: directionality of semantic labor, DSL, DS-6, semantic labor directionality, task-origin provenance, user labor drag, work-rate suppression, Semantic Economy, Crimson Hexagonal Archive, knowledge graph, web deployment, SPXI

Full text not yet recovered. If the canonical bytes surface on any authorial surface, a full-text version supersedes this record in-series per the versioning protocol. This record exists so the DOI resolves to the work’s true identity rather than to silence.
